claration for the following product/ Exact name/s of the product/s	s:
	nly from the following sources¹:
Extraction from leonardite	only from the following sources¹:
Extraction from leonardite Purification of drinking water	only from the following sources¹:
Extraction from leonardite Purification of drinking water	only from the following sources¹:
Extraction from leonardite Purification of drinking water Other:	
Extraction from leonardite Purification of drinking water Other: Only the following extractants are used	
Extraction from leonardite Purification of drinking water Other: Only the following extractants are used Potassium hydroxide (KOH)	
Purification of drinking water Other: Only the following extractants are used	only from the following sources ¹ : for the extraction of humic and fulvic acids from leonardite ²
Extraction from leonardite Purification of drinking water Other: Only the following extractants are used Potassium hydroxide (KOH) Potassium chloride (KCL)	
Extraction from leonardite Purification of drinking water Other: Only the following extractants are used Potassium hydroxide (KOH) Potassium chloride (KCL)	for the extraction of humic and fulvic acids from leonardite ²

Extraction with potassium compounds (e.g. potassium hydroxide, KOH; potassium chloride, KCl) is permitted. However, the evaluation team reserves the right to reject products with excessive potassium content originating from the extracting agent. Manufacturers must provide the necessary data to verify it. Extraction agents containing nitrogen compounds (e.g. ammonium, nitrate, urea) are not permitted.
