

The following substances must not be contained in the product:

- Piperonyl butoxide (PBO)
- Intentionally added components with a particle size of $< 0.3 \mu\text{m}$ (so-called nanoparticles)
- Alkyl phenol ethoxylates (APE including NPE)
- Chemical-synthetic chelators (e.g. EDTA),
- Phosphonates or combinations of substances, that phosphonates can emerge from
- Quaternary ammonium compounds (QAC's)
